Note:

GDTK - Immediate Assessment - used for triage and estimated repair time with parts needed in just minutes.

GDTK - Service Diagnostics - used for guided troubleshooting steps.

**See link for more information regarding both products above: <https://www.cummins.com/support/digital-products-and-services-support/guidanz-mobile>

Note:

Intapp - removes the Master, Adjustment, and Reset passwords from the electronic control module using your mobile device.

Please Note: Intapp units can only be used with the Guidanz Mobile App. They cannot be used with any version of INSITE.

CalAssist - is a password that provides the ability to modify the base calibration, uprate the engine, and to calibrate a ROM-Booted engine control module with a mobile device. CalAssist units are passwords: · Required to change the base calibration · Only needed if upgrading the calibration (e.g. Horsepower change; Some feature enables (ADEPT)) · NOT needed if only the revision of the calibration is changing (e.g. moving from p/n 12345.09 to 12345.17)

Please Note: CalAssist units can only be used with the Guidanz Service subscription. They cannot be used with any version of INSITE.
